Keybase proof

I hereby claim:

- I am laing_c on reddit.
- I am chrislaing on keybase.
- I have a public key ASDZRekW21AV_56NVgXoIuOAjJBgKgQ_4IqkO5FEml3mtAo

To claim this, I am signing this object:

```

Keybase proofs!

If you're a **reddit** user and a **keybase** user, then this is the subreddit to cryptographically tie the two accounts together. To generate your proof, just follow the instructions on your profile page on Keybase.io. Or, using the command line, run `keybase prove reddit`.

If you'd like to get the public key of any reddit user, just type their reddit username in the search box at Keybase.io, and you'll get it.

If you'd like to discuss Keybase in general, visit /r/Keybase, the general Keybase subreddit. This subreddit is for Keybase proofs only.
